CareerGen

CLASSES 6–10

AI LITERATURE CAMP

DON'T JUST GROW UP WITH AI.LEARN TO CREATE WITH IT.

Build the skills to understand, question & create with AI.

Students don't just learn about AI — they experiment, create and present something of their own.

8	24	OFFLINE
WEEKS	CLASSES	AT SCHOOL

2 THEORY CLASSES + 1 PRACTICAL EVERY WEEK

CareerGen

AI is already part of your world.
Now learn how to use it well.

AI is changing how we learn, work and create.
Students who understand AI today will be better prepared for tomorrow.

1 · UNDERSTAND AI
What AI is, how it works & where we use it.

2 · WORK WITH AI
Ask questions, experiment with AI & discover what's possible.

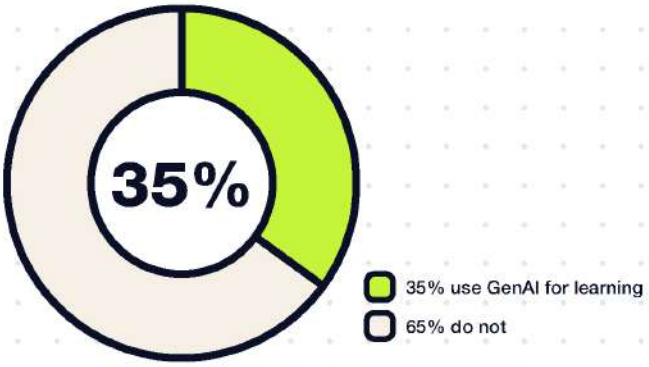

3 · CREATE WITH AI
Use AI to turn ideas into stories, projects & solutions.

LEARN SMARTER
Use AI to learn, research & explore.

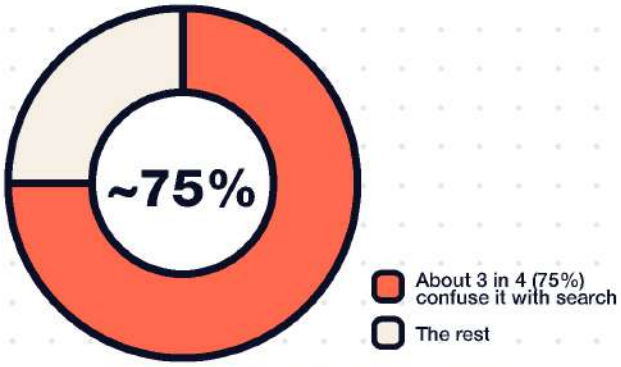

THINK CRITICALLY
Question information and spot what may be wrong.

CREATE CONFIDENTLY
Turn ideas into something real with AI.

AI IS ALREADY IN INDIAN CHILDREN'S LEARNING, BUT NOT ALWAYS UNDERSTOOD

Use generative AI for learning
Children who use EdTech platforms in India

Confuse GenAI with search
Children who are aware of GenAI

WHO IS THIS CAMP FOR?

Students in Classes 6–10 who are growing up in a world shaped by AI.

They don't need to be "tech kids" or future programmers. This camp is for students who are **curious, creative, and ready to explore how AI can help them learn, think, solve problems, and create.**

NO PRIOR AI OR CODING EXPERIENCE REQUIRED.
The goal: build AI literacy early, so whatever they choose to become, they know how to work with AI wisely.

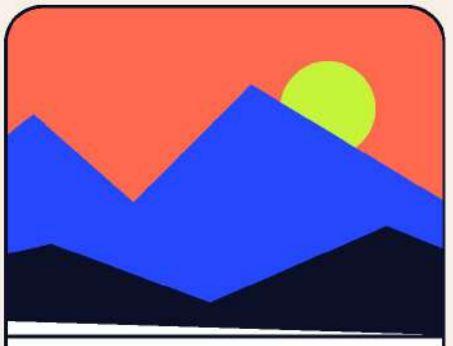

- CURIOUS USER 1
- CONFIDENT AI LEARNER 2
- CREATIVE BUILDER 3
- PORTFOLIO PRESENTER 4

WHAT CAN YOU CREATE?

CareerGen

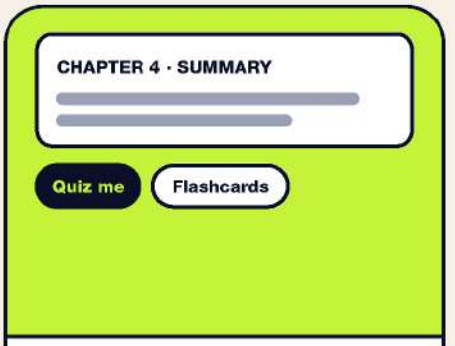

From “what if?” to “I made this.”

Real projects, made by students, with AI as a creative assistant.

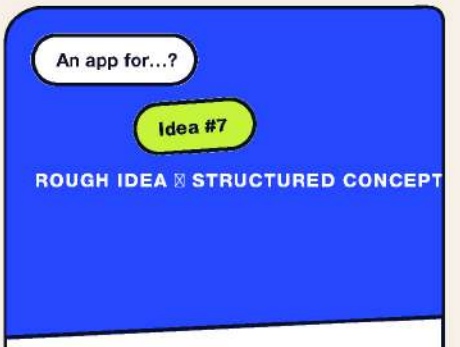

AI ART STUDIO

Create images, stories & visual ideas with AI.

STUDY SUPERPOWERS

Turn lessons into summaries, quizzes & flashcards.

IDEA LAB

Brainstorm ideas, explore possibilities & solve problems.

WEBSITE BUILDER

Learn website structure, explore UX/UI, experiment with basic HTML/CSS, and develop a personal portfolio

MUSIC LAB

Explore AI-assisted music or audio, experiment with mood and style, and discuss responsible creative use.

TOOLS WE EXPLORE

AI ASSISTANCE & LEARNING

- ChatGPT
- Gemini
- NotebookLM

VISUAL CREATIVITY

- Canva
- Adobe Firefly
- Canva AI

UX/UI DESIGN

- Figma
- Canva

WEBSITE CREATION

- Canva Websites
- Google Sites

AUDIO EXPERIMENTATION

- ElevenLabs

Students explore AI through hands-on activities, creative challenges, and real-world projects designed to build curiosity, confidence, and practical AI skills.

THE EIGHT-WEEK JOURNEY

CareerGen

8 weeks. 24 classes.
One portfolio site.

○ ○ Theory ×2 ● Practical ×1 — each week

01 Discover AI
Learn what AI is, explore its history and types, and identify AI in everyday life.

STUDENT OUTCOME An AI mind map.

○ ○ ●

02 Master the Art of Prompting
Learn how AI generates answers, then how to give clear instructions and improve prompts for more useful results.

STUDENT OUTCOME Improved prompts and a creative mini-project.

○ ○ ●

03 Learn Smarter with AI
AI-assisted reading, writing, research, study guides, quizzes, fact-checking and responsible use. LLMs and RAG at a beginner-friendly, conceptual level.

STUDENT OUTCOME An AI-assisted study guide with fact-checked information.

○ ○ ●

04 Create Images and Music
Image generation, visual storytelling, music or audio experiments, and creative prompts.

STUDENT OUTCOME A mini creative identity kit.

○ ○ ●

05 Explore UX/UI Design
Understand user experience, interface design, website layouts, colours, typography, and wireframes.

STUDENT OUTCOME A personal portfolio wireframe.

○ ○ ●

06 Build Your First Webpage
Understand basic HTML and CSS; use AI assistance to generate, inspect, and modify simple code.

STUDENT OUTCOME A basic webpage.

○ ○ ●

07 Create Your Portfolio
Combine writing, design, creative projects, and beginner website-building skills into a personal portfolio.

STUDENT OUTCOME A working portfolio draft.

○ ○ ●

08 Improve, Showcase & Present
Review the website, improve content and layout, test the result, and present the final project.

STUDENT OUTCOME A completed AI-assisted portfolio website, presented in class.

○ ○ ●

UNDERSTAND ▶ PROMPT ▶ LEARN ▶ CREATE ▶ DESIGN ▶ CODE ▶ BUILD ▶ PRESENT

CareerGen

Skills you keep.
A project you can show.

UNDERSTAND AI
Explain basic AI concepts, common uses, and limitations.

BETTER PROMPTS
Give clear instructions, refine results, and compare outputs.

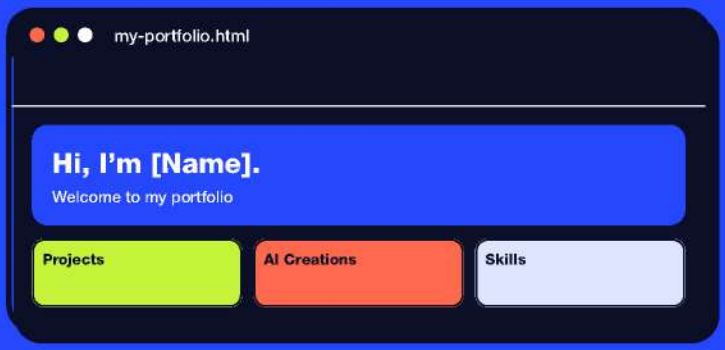

LEARN & RESEARCH RESPONSIBLY
Use AI to learn, verify facts, and stay safe.

CREATE ORIGINAL WORK
Experiment with AI-assisted images, visual designs, audio, and ideas

THINK LIKE A DESIGNER & BUILDER
Understand basic UX/UI concepts and experiment with HTML/CSS.

BUILD & PRESENT A PORTFOLIO
Showcase your projects on a personal website.

EVERY STUDENT WORKS TOWARDS A PERSONAL AI-ASSISTEDPORTFOLIO WEBSITE.

HOW THE LEARNING WORKS

Every project and assignment builds towards the final portfolio.

1 UNDERSTAND
Learn one concept.

2 EXPLORE
Experiment with an appropriate tool.

3 CREATE
Build a small project.

4 REFLECT
Review the result and explain what was learned.

BUILT FOR YOUNG LEARNERS. DESIGNED FOR RESPONSIBLE USE.

- ✓ Beginner-friendly learning for Classes 6–10.
- ✓ Guided, practical activities.
- ✓ Responsible AI use and fact-checking.
- ✓ School supervision, privacy awareness, and age appropriate tool selection.

Tool access, account creation, and publishing arrangements depend on applicable age requirements and school policies. Where a tool does not permit student accounts, teacher-led demonstrations or approved alternatives are used.

THE FUTURE ISN'T JUST SOMETHING TO WATCH. IT'S SOMETHING TO HELP CREATE.

Give students an early, responsible introduction to the tools and thinking shaping the world around them.

ABOUT CAREER CHARGE

"Skills can take you to the places where mass hiring can't."

Career Charge opens doors into the technology world through practical, career-focused learning, including a separate six-month training program for aspiring software developers. Our wider mission is to help learners build the skills to explore opportunities beyond conventional mass hiring.

The AI Literacy Camp brings that practical spirit to school students: AI literacy, creativity, responsible AI use, design, and beginner-level building skills.

BRING AI LEARNING TO YOUR SCHOOL

Introduce students to AI through guided learning, creative experiments, practical projects, and a portfolio they can present.

LET'S BRING AI LEARNING TO YOUR SCHOOL.
